

## **We asked hospital trusts\* how many SAS doctors they employed in leadership roles**

**Over 33% of hospital trusts confirmed that not a single SAS doctor held a leadership or extended role within their trust**

### **Amongst the different roles**

- only 0.1% of SAS doctors were medical directors,
- 0.2% clinical governance leads, and
- 4.5% educational supervisors

**This must change**

\* In December 2023 the BMA sent a Freedom of Information (FOI) request to 235 national health trusts in the UK (and healthcare boards in Scotland). 149 responded to this question.
